JAYAPRAKASH BISWAL

Python Developer | Web Developer | Data Analyst | Aspiring Data Scientist

Bhubaneswar, Odisha, India | Email: jayprakashbiswa49@gmail.com | GitHub: github.com/jayprakashbiswa49-pixel | LinkedIn: linkedin.com/in/jayaprakash-biswal-bb1937414

EDUCATION

BSc in Information Technology Management — NIIS Group of Institutions — ***Bhubaneswar, Odisha***

Third Year Undergraduate | ***CGPA: 8.14*** — *Expected 2027*

TECHNICAL SKILLS

Programming Languages:	Python, Java, C, SQL, JavaScript
Web Development:	HTML5, CSS3, Flask, Jinja2, REST APIs
Data Analysis & BI:	Pandas, NumPy, Matplotlib, Seaborn, MS Excel, Power BI
Machine Learning:	Scikit-learn, Data Preprocessing, Machine Learning Fundamentals
Developer Tools:	Git, GitHub, VS Code, Jupyter Notebook, Anaconda

FEATURED PROJECTS

Glint: AI-Powered Placement Portal | *Python, Flask, SQLAlchemy, PostgreSQL*

- Built an AI-oriented placement portal to manage student credentials, detect skill gaps, and match candidates with placement workflows.
- Implemented relational schemas with SQLAlchemy and connected PostgreSQL persistence deployed on Render.

Customer Churn Prediction | *Python, Flask, Pandas, Scikit-learn*

- Engineered an end-to-end machine learning application predicting customer churn based on subscription and demographic features.
- Handled exploratory data analysis, feature encoding, model evaluation, and created a Flask web inference interface.

Sales Data Analysis | *Python, Pandas, Matplotlib*

- Cleaned and analyzed comprehensive retail transaction records to identify sales patterns, regional performance, and peak revenue drivers.

Amazon Books Analysis | *Python, Pandas, Data Visualization*

- Evaluated Amazon bestseller trends, analyzing pricing distributions, author rankings, and sentiment-to-rating correlations.

IPL Data Analysis | *Python, Pandas, Matplotlib*

- Explored multi-season IPL tournament statistics, toss decisions vs match outcomes, and individual player performance analytics.

Python Hands-on Projects Suite | *Python, REST APIs, PyPDF2*

- Implemented a suite of practical utilities including real-time News API scraper, desktop water reminder, quiz engine, and automated PDF merger.
